

Error Log Entry - AddCoins, Ch6 Ex5

What error message did you encounter (if any)?

- "Nickels cannot be resolved to a variable"
- "The method getDollarAmount(int, int, int, int) is undefined for the type AddCoins"

What unexpected behaviour did your program exhibit?

- My program wouldn't run due to an "unresolved compilation problem."

What caused the issue? (ex, syntax error, logic error, incorrect function usage, etc)

- Semantic error/logic error
- Syntax error

Include a screenshot of specific lines of code.

```
System.out.print("Enter number of nickels: "); //Prompt
int nickles = scanner.nextInt();
```

```
System.out.print("Enter number of dimes: ");
int dimes = scanner.nextInt();
```

```
System.out.print("Enter number of quarters: ");
int quarters = scanner.nextInt();
```

```
System.out.println();
```

```
System.out.println("Quarters: " + quarters);
System.out.println("Dimes: " + dimes);
System.out.println("Nickels: " + nickels);
System.out.println("Pennies: " + pennies);
```

```
System.out.println();
```

```
String totalAmount = getDollarAmount(pennies, nickels,
```

```
String totalAmount = getDollarAmount(pennies, nickels, dimes, quarters);
```

```
System.out.println("Total dollar amount: " + totalAmount);
```

How did you fix the issue?

- Changed the spelling of nickels in line 29 when I declared the variable. This meant I could then call on it throughout the rest of my code.
- I had to define the method getDollarAmount in the AddCoins class.

Provide the corrected code or solution using a screenshot.

```
System.out.print("Enter number of nickels: "); //Prompt
int nickels = scanner.nextInt();
```

```
System.out.print("Enter number of dimes: ");
int dimes = scanner.nextInt();
```

```
System.out.print("Enter number of quarters: ");
int quarters = scanner.nextInt();
```

```
System.out.println();
```

```
System.out.println("Quarters: " + quarters);
System.out.println("Dimes: " + dimes);
System.out.println("Nickels: " + nickels);
System.out.println("Pennies: " + pennies);
```

```
System.out.println();
```

```
String totalAmount = getDollarAmount(pennies, nickels,
```

```
String totalAmount = getDollarAmount(pennies, nickels, dimes, quarters);
//Displays the formatted total dollar amount
System.out.println("Total dollar amount: " + totalAmount);
```

```
scanner.close(); //Close the Scanner
}
```

```
//Method that calculates total value of coins and returns it as a formatter String
public static String getDollarAmount(int pennies, int nickels, int dimes, int quarters) {
```
